

Rolacage Single Mast System

Rolatube's 4" version of its tactical mast is a strong and compact mast that is quick and easy to deploy. It is available in two versions, an 8m & 10m Rolacage mast system that will carry a maximum top load of up to 26 lbs. Both versions are expeditionary masts and can be deployed and recovered much faster than comparable products while taking up only a fraction of the packed volume.

Man-portable but supplied with mounting points incorporated into the Rolacage, it is also ideal for mounting on tactical vehicles. The systems' ruggedized aluminum construction with inbuilt braking function allows the 8m & 10m Rolacage mast system to be easily set at any height up to its maximum.

A range of accessories to aid deployment are available. The Central Guy Control for example reduces the number of personnel required to setup the mast enabling fast and easy setup by only two or three people. The top cap incorporates a 30mm socket for mounting ancillary equipment.

- Construct & Finish Mast Body: Black PP & glass fiber composite. Aluminum Rolacage.
- Environmental: Water & dust proof. Maintenance free.
- Specification: Complies with the relevant sections of MIL-STD-810G.
- Wind Rating: 100kmh (62 mph) bare mast only, secured with guy ropes and ground pegs.
- Total system weight is 55lbs including guy ropes and ground pegs.
- Available in two sizes:
 - PTS Part Number; RLC-RTL-408000-3-1, 8m 4" Black
 - PTS Part Number; RLC-RTL-410000-3-1, 10m 4" Black

We are an expeditionary communication solutions provider actively answering customer challenges and delivering innovative and cost-effective solutions.
